

ART 34 AMDT

## ABSTRACT

The present invention relates to a method of promoting growth comprising the step of administering an effective amount of a compound of formula I:

in which

X and Y are either the same or different and selected from a heteroatom;

(a) is a double or single bond depending on the heteroatoms X and Y;

R<sub>1</sub> to R<sub>5</sub> are either the same or different and selected from hydrogen or a non-deleterious substituent; and

R<sub>6</sub> and R<sub>7</sub> are either the same or different and selected from hydrogen and a non-deleterious substituent or one of R<sub>6</sub> and R<sub>7</sub> are absent when there is a double bond present,

pharmaceutically or veterinarily acceptable salts or derivatives, pro-drugs, tautomers and/or isomers thereof to a subject in need thereof.
